## **Access the AccuFund Accounting Suite in Any Browser with AccuFund Anywhere Cloud-Based Accounting Solution**

*Save money and resources with browser-based accounting for distributed offices and remote users*

**Needham, MA – May 15, 2013** – AccuFund, Inc., provider of financial reporting and accounting software for non-profit, municipal and government organizations, today announced AccuFund Anywhere, the new cloud-based version of the AccuFund Accounting Suite. With AccuFund Anywhere, users can access AccuFund’s core accounting functionality from any browser, enabling them to perform their accounting tasks whether they are in different offices or offsite locations.

AccuFund Anywhere allows organizations to reduce costs, improve efficiency and data accessibility without building the internal IT infrastructure on-premise solutions require. Unlike some multi-tenant cloud solutions, AccuFund Anywhere clients each have their own database, providing additional security and backup options.

AccuFund Anywhere includes the same reports and uses the same SQL database available in the Windows-based version of the AccuFund Accounting Suite. It also features an import-export capability that enables files on the system, such as spreadsheets and payroll lists, to be sent to or received from other systems. AccuFund Anywhere seamlessly integrates with AccuFund CRM, the company’s online software-as-a-service (SaaS) solution providing fundraising capabilities and constituent relationship management (CRM).

“AccuFund Anywhere is the only true nonprofit browser-based accounting solution available in the market today,” stated Peter Stam, president of AccuFund, Inc. AccuFund is using HTML 5 technology in building AccuFund Anywhere. “Our solution gives clients an excellent user experience that makes the transition from traditional Windows-based products to a cloud solution an easy process.” According to Gordon Holfelder, vice president of development.

“AccuFund Anywhere will also appeal to the non-profit customer who is doing fundraising, as it allows tight integration with AccuFund CRM, our comprehensive fundraising solution reducing redundant data entry.”

### **Availability and Pricing**

AccuFund Anywhere is available now with the AccuFund Accounting Suite core functionality, including the following modules: General Ledger, Accounts Payable, Cash Receipts, Bank Reconciliation, Financial Report Writer and Forms Designer. AccuFund Anywhere can be accessed from any browser on PCs or Apple computers, and without the need to download Java programs.

Pricing for AccuFund Anywhere Core for the initial user is \$190/month, with additional users at \$140/month each and a sliding scale offered for volume users.

### **About AccuFund**

AccuFund, Inc. provides scalable accounting and fundraising software to nonprofit organizations and government agencies. The AccuFund Accounting Suite fulfills the market's need for an accounting solution that is more sophisticated than off-the-shelf products, yet much less expensive, complex and difficult to use than the higher end offerings. AccuFund's products are available exclusively through Value Added Resellers (VARs) located throughout the United States. The VARs provide AccuFund's customers with cost-effective onsite training and installation assistance.
