AccuFund Introduces New Version of Employee Portal with Release of Web-Based Employee Time Entry Module

The AccuFund Accounting Suite's Web Interface Now Includes Module That Allows Employees to Enter their Time Sheets and View, Change and Print Time Sheet History

Needham, MA – January 6, 2012 – AccuFund, Inc., provider of financial reporting and accounting software for non-profit, municipal and government organizations, today announced a new version of the Employee Portal with the release of a web-based version of the Employee Time Entry module. A web-based component in the AccuFund Accounting Suite, the Employee Portal is a customizable interface that allows organizations to provide employee access to organizational news and personal information. With the Employee Time Entry module, employees can enter their own time sheets and view, change and print their history of time sheets.

Employees enter their time sheets in Employee Time Entry on a daily basis for a specified time period. Once an employee completes and submits a time sheet, a multi-level approval process begins in which supervisors, department managers and other required approvers review, make any necessary adjustments and approve the time sheet. The approved time sheet is available in the Payroll module in the AccuFund Accounting Suite. Employees can also view their history of time sheets and print a PDF report of their time sheets to a local computer.

“The Employee Time Entry module allows organizations to further empower employees to manage their own data and records,” stated Peter Stam, president of AccuFund, Inc. “At the same time, enabling employees to enter their own time information frees up payroll personnel from the time-consuming task of entering time sheets for all employees in the organization.”

The Employee Portal provides employees with the organization's public news as well as the ability to login and view private news and information. The Employee Portal can be configured to communicate information and events organization-wide or to individual departments or employees. PDFs of documents can be attached for printing or download.

The Employee Portal can be utilized through an internal network or over the web via an SSL connection. It is a self-contained web server application requiring no additional web server software.

Availability

The AccuFund Employee Time Entry module is available with the Employee Portal in both the Standard and Professional editions of the AccuFund Accounting Suite. The cost is based on the number of active employees in the organization.

About AccuFund

AccuFund, Inc. provides scalable accounting software systems to nonprofit organizations and government agencies. The AccuFund Accounting Suite fulfills the market's need for an accounting solution that is more sophisticated than off-the-shelf products, yet much less expensive, complex and difficult to use than the higher end offerings. AccuFund's products are available exclusively through Value Added Resellers (VARs) located throughout the United States. The VARs provide AccuFund's customers with cost-effective onsite training and installation assistance.
