## **AccuFund Forms Technology Partnership with Real Vision Software to Provide Enhanced Document Imaging and Storage**

### ***Integrates RVI's Document Imaging System with the AccuFund Accounting Suite***

**Needham, MA – March 29, 2016** – AccuFund, Inc., provider of financial reporting and accounting software for non-profit, municipal and government organizations, today announced a partnership with Real Vision Software (RVI) to integrate the RVI Document Imaging System with the AccuFund Accounting Suite, providing enhanced document imaging and storage capabilities for organizations with enterprise-level requirements.

“AccuFund currently has the ability to store document images internally, but we deal with many large clients who are looking for more advanced indexing and retrieval capabilities,” said Peter Stam, president of AccuFund, Inc. “We researched the non-profit space for a company offering robust document imaging and storage and found it is RVI’s specialty. Our tight integration with this feature-rich document imaging solution is especially attractive to those clients who have large amounts of data and require a more enterprise-level solution to meet their needs.”

When documents are scanned or uploaded in AccuFund, they are automatically indexed in RVI, making them easy to retrieve. There is no manual entry of code and other information related to the document, as RVI automatically captures that information from AccuFund and attaches it to the document. Documents stored in RVI are directly linked to transactions in AccuFund and can be viewed and reported within AccuFund as easily as those stored in the AccuFund database.

“We welcome this opportunity to integrate with AccuFund’s powerful accounting software package to provide more enhanced document imaging and storage capabilities for their non-profit clients,” said John Paul Roundtree, director of marketing and partner relations at RVI. “We have found that organizations in every industry need document imaging and non-profits are no different. We work with numerous types of non-profits across the U.S. and, like corporations, they have records retention requirements based on government or industry regulations.”

### **About RVI**

Real Vision Software, Inc., formed in 1992, is headquartered in Alexandria, LA. RVI is an industry leading Document Management Software Solution that captures, stores, manages, delivers and preserves your most important documents. The RVI solution is designed to integrate with end-user applications. The solution is cross-industry and has over 1,000 installs throughout the US, Canada, Europe and Central America. The Real Vision Imaging solution is supported on three platforms: RVI Cloud, RVI SB (Windows Platform) and RVI

i (IBM Power Systems running IBM i). RVI provides the expertise to help define your project requirements, implement your system, train your users and provide superb help desk support. For more information, visit [www.realvisionsoftware.com](http://www.realvisionsoftware.com).

**About AccuFund**

AccuFund, Inc. is a nonprofit and government financial improvement systems specialist. AccuFund uses award-winning financial software, consulting services and industry best practices to help organizations streamline processes, improve efficiency and lower costs. Their nonprofit and government financial success solutions are available on-premise or cloud-based.

AccuFund’s financial solutions are available exclusively through Value Added Resellers (VARs) located throughout the United States. The VARs provide AccuFund’s customers with cost-effective onsite training and installation assistance.
